

MOVING & SHAKING IN THE RIGHT DIRECTION, CLOCKAUDIO BUILDS ON ITS FOUNDATION FOR EXCELLENCE WITH A NEW & LARGER HEADQUARTERS.

GREAT BUSINESSES START WITH A GREAT FOUNDATION

Creating a globally successful microphone technology company doesn't happen overnight. It takes years of experience and a dedication to engineering products that not only keep pace with today's changing technologies but stay one step ahead.

They have successfully installed their products in some of the most prestigious facilities around the world and Clockaudio is the clear industry leader in customization and integration for microphone technologies.

Headquartered in the UK, Clockaudio has seen a trajectory of growth since opening its doors. Established in 1994 by a team of audio specialists with extensive experience in the design and manufacture of innovative pro-audio products, the company's reputation has been established on sound principles. Literally.

Clockaudio is dedicated to quality, service and innovation. So much so that audio professionals around the globe actively seek out and recommend Clockaudio for its reputation as a trusted and dedicated manufacturer.

Of their success, Jim Hallington, Managing Director for Clockaudio Ltd says, "It is all about being responsive to your clients. If you don't respond then you won't be successful. It's as simple as that."

Clockaudio's responsiveness and product quality has earned them an acclaimed spot in the minds of consultants, clients, representatives and distributors. In response to this success, they are planning their second move to a larger facility to meet the growth demands for their microphone technologies. Hallington says, "We're increasing our manufacturing capabilities substantially every year and we continue to establish new markets. We simply keep running out of space."

Hallington is personally overseeing their move planned for the fall of 2016. The new building will nearly triple the size of their current facility and give them the room they need to accommodate their growth. With additional space for offices, manufacturing, product development, storage, and parking this facility will be able to support the company's expanding business.

Other recent news for the company comes out of their North America headquarters in Montreal and includes a software conversion. The project started at the end of last year but now is enabling the company to manage a multitude of business functions from Customer Relationship Management (CRM) and Inventory Management to Payables and Payroll. Robert Moreau, Clockaudio's Managing Director for North

America says about the system, "The new platform has positioned the company to further improve its informational access, processes, reporting, and infrastructure. We feel this will not only help us to function optimally internally but enable us to respond to our clients, specifiers and sales teams even faster."

Look for the press release announcing the official move in before the end of the year.

ABOUT CLOCKAUDIO

For over 20 years, Clockaudio has been dedicated to manufacturing innovative pro-audio products.

With corporate headquarters located in the United Kingdom and additional offices in both North America (Montreal, Canada) and Asia (Singapore), Clockaudio is led by a talented team of audio specialists dedicated to quality, service and innovation.

Globally, audio professionals actively seek out and recommend Clockaudio for its reputation as a trusted and responsive manufacturer and its customer driven approach to audio solutions. Central to this is the in-house research and development that Clockaudio consistently reinvests in which allows clients to explore customized prototypes and develop specific briefs in partnership.

Consultants and contractors alike help to drive Clockaudio's product development process and appreciate the opportunity to be involved in the engineering process and final solution. The ability to customize is just one of the many factors which makes Clockaudio...clearly different.
