Meet the Second Generation: **Introducing Clockaudio's CDT100 MKII**

May 24 , 2018 – Waterlooville, Hampshire, United Kingdom – Clockaudio, a global leader in pro-AV microphone technologies based in the UK and with offices in North America and Asia, has officially launched their newest addition to the Clockaudio family, the CDT-100 MKII.

The CDT-100 family is built to streamline data and power cables for boardrooms, conference rooms and video rooms, reducing the cabling requirements from multiple and individual microphones from the conference table to the AV cabinet.

Offering several more options than its CDT-100 predecessor, the 'second generation' CDT-100 MK II Dante device has been upgraded with an extra output pin - in preparation for the arrival of Clockaudio's new RGB control devices. The extra output pin, located on the RJ45 ports, is positioned for lighting up the blue LED on the TS003. In addition, all three LED colors can individually be set from 'off', to 'full brightness' in 256 steps, offering the full range of the color spectrum.

Furthermore, the two remaining pins on the RJ45 ports can now enable the hook up of two extra contact closures, such as the REED switch on Clockaudio's CRM series microphones and/or ANY dry contact closure of additional control devices.

Of the CDT-100 MK II, Managing Director of Clockaudio North America, Robert Moreau says: "With the Mark II version of our CDT-100, we continue to invest in product evolution to offer integrators and their clients more options when it comes to microphone controls and customization."

ABOUT CLOCKAUDIO

For over 20 years, Clockaudio has been dedicated to manufacturing innovative pro-audio products.

With corporate headquarters located in the United Kingdom and offices located in North America (Montreal, Canada) and Asia (Singapore), Clockaudio is led by a talented team of audio specialists dedicated to quality, service and innovation.

On a global level, audio professionals actively seek out and recommend Clockaudio for its reputation as a trusted and responsive manufacturer and its customer driven approach to audio solutions. Central to this, is the in-house research and development that Clockaudio consistently reinvests in, which allows clients to explore customized prototypes and develop specific briefs in partnership.

Consultants and contractors alike help to drive Clockaudio's product development process and appreciate the opportunity to be involved in the engineering process and final solution. The ability to customize is just one of the many factors which makes Clockaudio clearly different.
