## Clockaudio Launches the CDT100 TRANSPORTER and Expands into Dante Technologies

**April 27, 2015 – Waterlooville, Hampshire, United Kingdom** – Clockaudio, a global leader in pro-av microphone technologies based in the UK and with offices in North America and Asia, is proud to announce the launch of its CDT-100 TRANSPORTER.

In response to the need to streamline data and power cables for boardrooms, conference rooms, and video conference rooms, the CDT-100 reduces cabling requirements from multiple and individual microphones from the conference table to the AV cabinet.

This advanced professional Dante communication product combines audio and control transport using network based Dante protocol. By taking advantage of the Dante technology and based on the high performance and pre-configurable hardware platform, this product transfers audio and control signals via widely used Ethernet for perfect sound quality.

Robert Moreau, Managing Director for Clockaudio North America states, “The CDT-100 provides a cost effective means of transporting audio and control using a single Cat 5/6 cable. It also simplifies the connectivity and the need for multiple power supply units. One PSU not only can power up to 6 CDT 100, but handles as well power requirements for all control devices. We are very excited about incorporating Dante.” Indeed, the audio control transport is a welcome answer to those challenged with handling multiple cable runs back to the AV cabinet. Moreau adds, “As the industry evolves, we are continuously looking for better ways to make installations easier for all of our integration customers, and thanks to their input, we have come up with the CDT100. The Clockaudio Dante Transporter opens a new chapter in Clockaudio’s history and sets the stage for new and exciting products that meet today’s requirements.”

## **ABOUT CLOCKAUDIO**

For over 20 years, Clockaudio has been dedicated to manufacturing innovative pro-audio products. With corporate headquarters located in the United Kingdom and offices located in North America (Montreal, Canada) and Asia (Singapore), Clockaudio is led by a talented team of audio specialists dedicated to quality, service and innovation.

On a global level, audio professionals actively seek out and recommend Clockaudio for its reputation as a trusted and responsive manufacturer and its customer driven approach to audio solutions. Central to this is the in-house research and development that Clockaudio consistently reinvests in which allows clients to explore customized prototypes and develop specific briefs in partnership. Consultants and contractors alike help to drive Clockaudio's product development process and appreciate the opportunity to be involved in the engineering process and final solution. The ability to customize is just one of the many factors which makes Clockaudio clearly different.
