

PRODUCT FEATURE

Microphone Customization and the CUI-2 USB Interface

The CUI-2, Clockaudio's USB Interface, is the conduit to making Clockaudio microphone solutions (and great audio quality) accessible to the remote work force regardless of their work type, work style and professional needs.

With the CUI-2, you can now maintain the highest degree of sound integrity while configuring a customized microphone solution, uniquely designed to suit you and your work environment.

Easy to install and even easier to use, you can choose any microphone, any RGB touch switch and with a simple USB connection, create a solution that works best for you.

Highlights of the CUI-2

- USB Stereo Microphone Preamp Interface
- USB Bus Powered, 24-bit/48kHz, Plug-and-Play driverless with PC, MAC & others
- Easy to install and mounts under desk or table with two screws
- Low noise design, optimized for Clockaudio Microphones
- 10-50dB Gain Control
- 48V Phantom Power
- Touch Switch Port for use with Clockaudio Capacitive Touch Switches
- LED Brightness Control
- RGB color selection for Mute and Unmute
- Latching Mute and Push to Mute Modes
- VU Metering for Microphone Gain Setup via TS buttons
- Demo Mode Plays Audio Test Tone to USB Input and RGB Color Show
- Compact Aluminum Enclosure with Flange Mounts
- Tamper resistant front cover included
- Optional 12V external supply

Our goal has always been to engineer solutions and design products that create a truly collaborative experience. The CUI-2 is just the latest innovation that makes Clockaudio “clearly different” as we stand out from the rest.

As always, if you have any questions, contact our customer service and technical support team.
