

Product Feature of the Month

New RGB Control Devices for CDT 100

For the arrival of our new RGB control devices, the *CDT100 MK2 Dante device has been upgraded* with an extra output pin on the RJ45 ports for lighting up the blue LED on all new Clockaudio touch sensitive switches.

In addition, its PWM driver lets you *adjust the brightness of all three LEDs individually in 256 steps*, offering the full range of the color spectrum.

Furthermore, the two remaining pins on the RJ45 ports can now enable the hook up of *two extra contact closures*, such as the REED switch on our CRM series microphones and/or any dry contact closure of additional control devices.
