Clockaudio Releases Firmware Update for CDT100

September 21, 2016 – Waterlooville, Hampshire, United Kingdom – Clockaudio, a global leader in pro-AV microphone technologies based in the UK and with offices in North America and Asia, has released a firmware update for the CDT-100 Transporter that features new light intensity and color controls.

Based on a high performance and pre-configurable hardware platform, the CDT-100 offers an advanced professional communication product that transfers audio and control signals via widely used Ethernet. The CDT-100's firmware update basically enables the integrator to set incremental tolerances that control the intensity for the status indicator lights on the CRM-S Series, CS-S Series, CH-32, TS001 and certain shock mounts. Adjustments can be made in 10% increments and the user can also combine colors to create additional status color codes.

Seeing the new feature for the first time at Infocomm16 this past June, John Cardone, longtime Clockaudio Representative from Cardone Solomon Associates said, "This is something that our clients and dealers have been asking for and I'm excited to see it. Clockaudio has always been one of the most responsive manufacturers and the industry really appreciates the quality of their products." Robert Moreau, Managing Director for Clockaudio North America adds, "We are always looking for ways to provide dealers with more tools and solutions so that they can meet their clients need. We were impressed with the feedback at Infocomm about this update."

The new firmware is available now. For more information please contact Clockaudio at info@clockaudio.com or visit www.clockaudio.com.

ABOUT CLOCKAUDIO

For over 20 years, Clockaudio has been dedicated to manufacturing innovative pro-audio products. With corporate headquarters located in the United Kingdom and offices located in North America (Montreal, Canada) and Asia (Singapore), Clockaudio is led by a talented team of audio specialists dedicated to quality, service and innovation.

On a global level, audio professionals actively seek out and recommend Clockaudio for its reputation as a trusted and responsive manufacturer and its customer driven approach to audio solutions. Central to this is the in-house research and development that Clockaudio consistently reinvests in which allows clients to explore customized prototypes and develop specific briefs in partnership. Consultants and contractors alike help to drive Clockaudio's product development process and appreciate the opportunity to be involved in the engineering process and final solution. The ability to customize is just one of the many factors which makes Clockaudio clearly different.
