## Clockaudio Launches Tri-Element Array Hanging Microphone C303W-RF

**May 19, 2015 – Waterlooville, Hampshire, United Kingdom** – Clockaudio, a global leader in pro-av microphone technologies based in the UK and with offices in North America and Asia, is proud to introduce their latest addition, the C303W-RF Tri-Element hanging microphone array.

Designed for audio or video conferencing, the C303W-RF offers consultants and designers a new option when specifying hanging microphones in applications that demand the highest sound quality.

This new product features three high quality Cardioid capsules covering a 360 degree pick up pattern. Each independent capsule is RF immune, will capture approximately 120 degrees and is optimized for speech intelligibility.

The C303W-RF is a non-proprietary microphone array, which makes it easy to install, and also compatible with all popular DSP units. For applications where table microphones are not an option, the C303W-RF offers a great alternative to bring the microphone capsules closer to the participant, with a minimal foot print in the conference room. Full technical specifications will be available in the products section of the Clockaudio website.

Robert Moreau, Managing Director for Clockaudio North America states, "As microphone specialists, we are always excited to give new options to our customers, and the C303W-RF definitely responds to an immediate requirement of the market."

# CLOCKAUDIO

The product will ship by late June and will be on display during Infocomm15, June 17 – 19, 2015 in Orlando, Florida. Visit the Clockaudio booth # 451 on the show floor for a booth tour and demonstration of this and other exciting Clockaudio solutions.

## **ABOUT CLOCKAUDIO**

For over 20 years, Clockaudio has been dedicated to manufacturing innovative pro-audio products. With corporate headquarters located in the United Kingdom and offices located in North America (Montreal, Canada) and Asia (Singapore), Clockaudio is led by a talented team of audio specialists dedicated to quality, service and innovation.

On a global level, audio professionals actively seek out and recommend Clockaudio for its reputation as a trusted and responsive manufacturer and its customer driven approach to audio solutions. Central to this is the in-house research and development that Clockaudio consistently reinvests in which allows clients to explore customized prototypes and develop specific briefs in partnership. Consultants and contractors alike help to drive Clockaudio's product development process and appreciate the opportunity to be involved in the engineering process and final solution. The ability to customize is just one of the many factors which makes Clockaudio clearly different.
